

# ISCHP 2017

## 10th Biennial Conference

Loughborough University, Centre for Research in Communication and Culture, Department of Social Sciences, Sunday 9 - Wednesday 12 July 2017

We are very pleased to give a warm welcome to old and new friends at the 10<sup>th</sup> biennial conference of ISCHP. Our society has flourished over the last 20 years in an unusual way. Everybody who shows any interest in our shared news-list or attends a conference is a member forever (unless you specifically ask to be taken off the list) and we will never ask you for a joining fee. So, since you are all members of the ISCHP, please join us at the AGM (4pm on Tuesday 11<sup>th</sup>). Joining this meeting is a good way for everybody to participate in the society's functioning, to get to know the office holders for the next two years, and the place in the world where we might meet again. This year, you will meet the new Chair and various other offices will need new volunteers.

Many thanks to the members of the 2017 organising committee, ably led by Liz Peel, who have been working very hard on the arrangements and the programme. Thanks to this group, and all contributors, we have an engaging programme with an exciting array of diverse activities including workshops, presentations, symposia, interactive posters, Pecha kucha, and 5 minute challenges, as well as other attractions such as a photographic display and book launches to showcase our members' diverse contributions to the aims of critical health psychology. This year the 5 minute challenges will be particularly interesting as we invite speakers to challenge critical health psychology itself. Thanks are also due to our keynote speakers, Ama de Graft Aikins, Antonia Lyons, Dave Harper and Davina Cooper for kindly agreeing to set the scene by presenting critical approaches to applied and theoretical health psychology. These guest speakers reflect the strong international basis of ISCHP. There are also excellent opportunities to meet and socialise. At ISCHP we attach a lot of importance to enjoying each other's company. I look forward to meeting you at what is the most stimulating and supportive meeting of health psychologists that I attend.

*Professor Christine Stephens* Chair of the *International Society of Critical Health Psychology*
